Art Unit: 2879

1. Applicant's election with traverse of Group II, claims 4-6 in Paper No. 10 is acknowledged. The traversal is on the ground(s) that the Examiner has not shown a serious burden to search all the six claims. This is not found persuasive because the Examiner has shown seriousness of burden based on two separate classifications of the two Groups. The search for Group I will be different from that of Group II.

The requirement is still deemed proper and is therefore made FINAL.

2. Group I, claims 1-3 is therefore withdrawn from consideration. An action on merits including claims 4-6 is as follows.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 4-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Deal et al (U.S.P. 4,623,820).

Art Unit: 2879

Deal et al disclose applicant's claimed CRT (Figure 1) in which a heat absorbing carbon film (35) in silica (SiO_2) is formed on a conductive reflecting film (33). (col. 2, first two paragraphs).

Consequently, Deal et al anticipate applicant's claims 4-6.

Claims 4-6 include process steps recited therein and are therefore of product-by-process nature.

The courts have been holding that: "--In spite of the fact that a product-by-process claim may recite only process limitations, it is the product which is covered by the claim and not the recited process steps--". (In re Hughes, 182 USPQ 106)--". Also --Patentability of a claim to a product does not rest merely on a difference in the method by which that product is made. Rather, it is the product itself which must be new and unobvious. (In re Pilkington, 162 USPQ 147)--". Accordingly, "--a rejection based on 35 U.S.C. section 102 or alternatively on 35 U.S.C. section 103 of the statute is eminently fair and acceptable." (In re Brown and Saffer, 173 USPQ 685 and 688). --The determination of the patentability of product-by-process claim is based on the product itself rather than on the process by which the product is made--". In re Thrope, 777 F.2d 695, 227 USPQ 964 (Fed. Cir. 1985).

As such, no patentable weight is given to process steps recited in claims 4-6.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Deal et al (U.S.P. 3,703,401) is cited for showing a layered structure film disposed on an inner surface of a CRT.
